When you come to next stitch to be knitted, the yarn for the new colour will be at the front of your work. Take yarn to the back of your work, then put it UNDER the colour you have just used. Commence knitting with your new colour. This process wraps the new colour with the old colour and prevents a hole forming.

Instructions

Using Shade 1, cast on 20 stitches, then using Shade 2, cast on 10 sts. (30 stitches in total)

Next Row: Using Shade 2, k10, CC, knit to end of row using Shade 1.

Next Row: Using Shade 1, K20, CC, knit to end of row, using Shade 2.

Repeat these two rows until work measures 160 cm.

To Complete

Darn ends in. Join cast off edge to cast on edge using a flat seam.
